## Investor Update – October 10, 2019

### Note to Investors

This abbreviated Investor Update is being provided to communicate certain actual third quarter 2019 operating statistics. It also includes forecasted total unit revenue (RASM), unit cost excluding fuel and other items (CASMex), estimated economic fuel cost per gallon for the quarter, expected non-operating income, and third quarter share repurchase information.

Unit revenue, unit cost and other financial forecasts are estimates only. Actual amounts reported may differ and are dependent on our normal quarter-end closing process.

A full Investor Update with information about fuel hedge positions, planned capital expenditures, fleet information, and share repurchase activity will be provided in connection with our third quarter earnings release scheduled for October 24, 2019.

References in this update to “Air Group,” “Company,” “we,” “us,” and “our” refer to Alaska Air Group, Inc. and its subsidiaries, unless otherwise specified.

### Information about Non-GAAP Financial Measures

This update includes forecasted operational and financial information for our operations. Our disclosure of operating cost per available seat mile excluding fuel and other items provides us (and may provide investors) with the ability to measure and monitor our performance. The most directly comparable GAAP measure is total operating expense per available seat mile. However, due to the large fluctuations in fuel prices, we are unable to predict total operating expense for any future period with any degree of certainty. In addition, we believe the disclosure of fuel expense on an economic basis is useful to investors in evaluating our ongoing operational performance. Please see the cautionary statement under “Forward-Looking Information.”

We are providing unaudited information about fuel price movements and the impact of our hedging program on our financial results. Management believes it is useful to compare results between periods on an “economic basis.” *Economic fuel expense* is defined as the raw or “into-plane” fuel cost less any cash we receive from hedge counterparties for hedges that settle during the period, offset by the recognition of premiums originally paid for those hedges that settle during the period. Economic fuel expense more closely approximates the net cash outflow associated with purchasing fuel for our operation.

### Forward-Looking Information

This update contains forward-looking statements subject to the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These statements relate to future events and involve known and unknown risks and uncertainties that may cause actual outcomes to be materially different from those indicated by any forward-looking statements. For a comprehensive discussion of potential risk factors, see Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2018, as well as in other documents filed by the Company with the SEC after the date thereof. Some of these risks include general economic conditions, increases in operating costs including fuel, competition, labor costs and relations, our indebtedness, inability to meet cost reduction goals, seasonal fluctuations in our financial results, an aircraft accident, changes in laws and regulations and risks inherent in the achievement of anticipated synergies and the timing thereof in connection with the acquisition of Virgin America. All of the forward-looking statements are qualified in their entirety by reference to the risk factors discussed therein. We operate in a continually changing business environment, and new risk factors emerge from time to time. Management cannot predict such new risk factors, nor can it assess the impact, if any, of such new risk factors on our business or events described in any forward-looking statements. We expressly disclaim any obligation to publicly update or revise any forward-looking statements after the date of this report to conform them to actual results. Over time, our actual results, performance or achievements will likely differ from the anticipated results, performance, or achievements that are expressed or implied by our forward-looking statements, and such differences might be significant and materially adverse.

## AIR GROUP - CONSOLIDATED

### Third Quarter 2019

#### Operating Statistics

	Q3 2019	Q3 2018	% Change
Revenue passengers (in thousands)	12,574	12,128	3.7%
Traffic (RPMs in millions)	15,026	14,386	4.4%
Capacity (ASMs in millions)	17,519	16,943	3.4%
Load factor	85.8%	84.9%	0.9 pts

#### Forecast Information

	Q3 2019 Forecast	Q3 2018	% Change	Prior Guidance September 4, 2019
Revenue per ASM (cents)	13.61¢ - 13.64¢	13.05¢	~ 4.4%	~ 3.0% - 5.0%
Cost per ASM excluding fuel and special items (cents) <sup>(b)</sup>	8.43¢ - 8.45¢	8.15¢	~ 3.4%	~ 5.0%
Fuel gallons (000,000)	227	218	~ 4.1%	230
Economic fuel cost per gallon <sup>(a)</sup>	\$2.13	\$2.33	~ (8.6)%	\$2.15

(a) Our economic fuel cost per gallon estimate for the third quarter includes the following per-gallon assumptions: crude oil cost – \$1.34 (\$56 per barrel); refining margin – 56 cents; cost of settled hedges – 2 cents; with the remaining difference due to taxes and other into-plane costs.

(b) Our CASMex forecast has improved from our previous guidance due to higher than planned capacity in the quarter, productivity gains exceeding plan, and some maintenance cost shift into the final quarter of 2019.

#### Nonoperating Expense

We expect that our consolidated nonoperating expense will be approximately \$6 million in the third quarter of 2019, benefited by realized gains on sales of securities during the quarter.

#### Effective Tax Rate

We expect our third quarter 2019 effective tax rate on adjusted earnings will be 23% due to a clarification of certain tax laws around bonus depreciation. We expect our 2019 full year effective tax rate will be approximately 24%.

#### Stock Repurchase and Share Count

In 2019, we have repurchased a total of 874,019 shares of common stock for approximately \$53 million, on our way to an expected \$75 million in total shares repurchased this year. We expect our weighted-average basic and diluted share counts will be 123.3 million and 124.1 million, respectively, for the third quarter of 2019.
